1. Write an array of months in a year. Using `console.log` display June, October and January from the array.

2. Write an arrays of days in a week. Using `console.log` display Sunday from the array.

3. Print all negative elements from the array `[2, -4, 5, -2, -11]`.

4. Print all elements with indices divisible by 3 from the array `[5, 15, -5, 20, 12, 18, 72, 14, 9]`.

5. What is the index of 24 in the following array?
   `[[1, 2, 1, 24], [8, 11, 9, 4], [7, 0, 7, 27], [7, 4, 28, 14], [3, 10, 26, 7]];`

   Using `console.log`:
   - Display the 3rd element of the array,
   - Display the 2nd element of the 3rd element.
